TICE FIRE AND RESCUE DISTRICT

9351 Workmen Way | Fort Myers, FL 33905 | TiceFire.gov

ISO Public Protection Classification

November 9, 2026

To Whom It May Concern:

The Insurance Services Office (ISO) has completed its review of the fire suppression features provided by the Tice Fire and Rescue District. The resulting community Public Protection Classification is **Class 02/10**.

Because this is a split classification, the two classes apply as follows:

- **Class 02** applies to properties within 5 road miles of a recognized fire station and within 1,000 feet of a fire hydrant or alternate water supply.
- **Class 10** applies to properties beyond 1,000 feet of a fire hydrant but within 5 road miles of a recognized fire station, and to properties more than 5 road miles from a recognized fire station.

Where an alternate water supply is used, the first class (Class 02) applies to properties within 5 road miles of a recognized fire station, with no hydrant distance requirement. Properties with a Needed Fire Flow in excess of 3,500 gpm are evaluated separately and assigned an individual classification.

Please provide this letter to your insurance company. If you have questions, contact the District at 9351 Workmen Way, Fort Myers, FL 33905, or visit TiceFire.gov.

Sincerely,

Michael Runk
Fire Chief
Tice Fire and Rescue District
